

## SECURE YOUR SLEEVES

Engineered solutions for pipeline integrity digs

With pipeline repair, we have you covered for securing and supporting pipe sections during maintenance and installation.

## **SLEEVE-CLAMP™** SLEEVE CLAMP™ BY LVI SUPPLY

Designed to hold pipe sleeves in place for welding during pipeline repair and rehabilitation, SLEEVE CLAMP™ is the engineered solution the pipeline industry has been waiting for.

Featuring innovative color-changing chain links that visibly show chain wear from heat, SLEEVE CLAMP™ also includes a chain overload link and a preset torque wrench. Achieve maximum clamping force in a safe, reliable system with SLEEVE CLAMP™. You'll want it handy for your next integrity dig.

### SYSTEM FEATURES

- Specialized chain coating easily identifies if chain components have been compromised from overheating during pipe welding
- Overload link designed as a fail-safe to prevent excessive chain load
- Easy to use calibrated torque wrench included
- Engineered system components work together for enhanced safety
- Comes in two sizes dependent on clamping force required:  
**MEDIUM** (7 ton clamping force) and **LARGE** (13.5 ton clamping force)
