

HEAVY DUTY PUMP & POWER

Slurry pumps and generators make work happen.

We work with top manufacturers of pumps and generators to bring you quality equipment that works as hard as you do.

PITPUMP™ BY LAVALLEY INDUSTRIES

A robust, purpose-built slurry pump for horizontal directional drilling (HDD) fluid cycling operations, the PITPUMP™ is advanced and powerful. Its submersible design and innovative liquid cooling system keep the PITPUMP™ slurry pump going for the duration of the job. This pump is compatible with the EMPOWER™ line of generators to run at maximum efficiency for fuel savings and smart health monitoring.

EMPOWER™ GENERATORS

Offering fuel-efficient energy solutions for any job site, the EMPOWER™ line of generators are built with future connectivity needs in mind. Coupled with specialized implements (like the PITPUMP™ slurry pump), these generators load follow based on demand. EMPOWER™ generators are perfect for microgrids, utility power, EV charging, and more.
